Prevent the spread of the flu at work

The recent H1N1 flu outbreak has made illness prevention even more important. This poster is an effective communication to inform employees of ways to prevent the spread of germs.

- Includes common symptoms of the flu and steps to prevent infection
- Reinforces your commitment to a healthy workplace

ComplyRight™ Flu Poster

NR0018 Price Each \$14.99
Laminated. Size 10" x 14".

Flu & Illness Prevention:

Help Stop the Spread of Germs

The flu (influenza), colds and similar illnesses are caused by viruses that infect the nose, throat and lungs. These viruses usually are spread from person to person when an infected person coughs or sneezes.

Common symptoms of the flu include:

- Fever (usually high)
- Extreme fatigue
- Sore throat
- Muscle aches
- Headache
- Cough
- Runny or stuffy nose
- Nausea, vomiting and diarrhea

Take the following actions to protect yourself and others:

- ✓ **Avoid close contact.** Keep your distance from people who are sick. Likewise, when you are sick, limit your interaction with others to reduce the spread of germs.
- ✓ **Stay home when you are sick.** If possible, stay home from work, school and other locations when you are sick, to prevent others from catching your illness.
- ✓ **Cover your mouth and nose.** Cover your mouth and nose with a tissue when you cough or sneeze — or cough or sneeze into your upper sleeve, not your hands.
- ✓ **Clean your hands.** Wash your hands often with soap and warm water, especially after you cough or sneeze. Alcohol-based hand sanitizers are also effective.
- ✓ **Avoid touching your eyes, nose or mouth.** Germs typically are spread when you touch a contaminated surface (doorknob, shopping cart, remote control, telephone, keyboard, etc.) and then touch your eyes, nose or mouth.
- ✓ **Practice other good health habits.** Get plenty of sleep, be physically active, manage your stress, drink plenty of fluids, and eat a balanced, nutritious diet.
